

CONTENTS

Preface 7

Introduction 13

The content of the manual 15

1. Introduction to the theoretical basis of the research manual 17

The concept of stress 17

The concept of coping 19

A theory-driven research method 21

A change of perspective 24

A systemic onset 25

The goal hierarchy as a leading principle 26

The concept of goal – the heart of the theory and method 28

The concept of hierarchy 29

The goal hierarchy and the wellbeing of human beings 30

The role of the goal hierarchy in the coping process 31

Emotions as a ‘second language’ 33

The three-part structure of the coping process 38

Different types of coping 42

Outcome of the coping process 46

Summary 47

2. The formative elements of the coping course 48

1. The objective character of a situation of mental strain 49

2. The subjective character of a situation of mental strain 53

3. The level of perceived reversibility of the burden 55

4. Emotional reactions 58

5. Resources of personality 59

6. Environmental resources 63

3. Guidance on the analysis of coping courses	68
STEP ONE: Identify the distressing event(s)	76
STEP TWO: Find the personal meanings	77
STEP THREE: Estimate the emotional implications	78
STEP FOUR: Map the coping strategies used by the informant	92
STEP FIVE: Identify interventions	100
STEP SIX: Record the outcomes of each sub-process	102
STEP SEVEN: Detect patterns across cases	104

4. The coping interview 106

The research contract	106
Coping memories: stored, forgotten or changed?	110
The coping interview as a non-linear process	122
Interview guide for the coping process	123
The pitfalls of the research interview	126

5. The life-historical resource interview 129

The structure of a life-historical resource interview	130
Analytic scheme for resources	131

6. Publication of the results of the microanalysis 133

Schemes of results regarding coping courses	133
Examples of coping narratives	138
Conclusion	140

Appendix

The method used on a real case	141
